INSTALLATION AND OPERATING INSTRUCTIONS
for
**Grant GSX1
Solar Controller**

DOC.97-00/01 Rev.00 November 2013

Wiring diagram

The following wiring diagram should be followed when using the Grant GSX1 solar controller with an unvented solar cylinder fitted with a 'dual stat' (combined high limit and control thermostat) controlling the operation of both a high temperature 2-port valve (on the solar primary circuit) and solar pump.

This information should be used in conjunction with the Installation and Operating instructions supplied with the controller, in particular page 14, Section D.1.
